Tom:

I finished reviewing these tables and am sending them on to you. I made a few changes that are noted in red. Some of the data in the tables from which the quality tables are generated is incorrect as follows:

(b) (5)

[REDACTED]

On page 30 in the table on MIM Hauptmann needs a date.

(b) (5)

[REDACTED]

I am supposed to be at my house sometime during the day on Wednesday to receive delivery of kitchen cabinets. I may either arrive late or leave early. The deliverers will call me Tuesday night to give me the time interval during which I have to be there to receive the cabinets.

Attached you will find the hematopoietic evidence tables. Hopefully I will see you on Wednesday.

Keep warm in this crazy weather.

Dave Bayliss
